# Drogue Aerial Refueling Systems

## RP-910E-75 Wing Aerial Refueling Pod (WARP) and FR-600-84MDR Centerline Drogue System (CDS)

The KC-46 WARP and CDS Refueling systems are based upon Cobham's latest generation Refueling systems as well as Cobham's proven legacy equipment. The RP-910E-75 WARP is based upon Cobham's 5th generation 900E electric architecture and represents the most advanced Refueling systems in operation today. The FR-600-84MDR CDS integrates Cobham's proven hydraulic architecture with the latest digital controls to provide a reliable and cost effective centerline system.

### Key Features Include:

- Variable drag drogue providing exceptional operating speed envelope capable of Refueling V22 and fast jets
- Dual redundant CDS hose reel controls and sensors
- Accommodates a wide range of receiver aircraft
- BIT detection and fault isolation
- Light weight solution
- Enhanced hose response WARP shape optimized for KC-46

FR-600-84MDR CENTERLINE DROGUE SYSTEM	
Flow rate	>400 gallons per minute
Weight	Up to 990 pounds
Delivery Pressure	50 psig
Platform Integration	Based upon existing systems currently in service
Hose Length	75 ft trailed length
Operating Envelope	180 to 325 kias

RP-910E-75 WING AERIAL REFUELING POD	
Flow rate	>400 gallons per minute
Weight	Up to 1425 pounds
Delivery Pressure	50 psig
Platform Integration	Based upon existing wing pods currently in service
Hose Length	75 ft trailed length
Operating Envelope	180 to 325 kias

Cobham is the world's leading supplier of aerial refuelling technology.
